

## BIRDS OF BARTICA DISTRICT

### ADDITIONAL LIST

At the time of publication of Volume I of "Tropical Wild Life"\* the list of birds observed by ourselves or collected by Whitely in Bartica District numbered three hundred and fifty-one forms.

Since then a considerable addition to this list has accumulated from various sources, and these seventy-five new names I now present, bringing the total to the really remarkable number of four hundred and twenty-six different species of birds, all occurring within a radius of ten miles of our Research Station. These lists are, of course, to be considered as merely convenient check-lists, preliminary to the ultimate elaboration of the life histories of the various species.

The number preceding the name corresponds to that in Brabourne and Chubb's "List of the Birds of South America."
